

Ceramic Laboratory

Ceramic is a field of research and great potential at present. For this purpose an advanced ceramic lab has recently been developed in the department. A good deal of research work is in progress to improve the local industry. Ceramic lab has the following equipment and facilities:

DTA

TGA

Tube furnace upto 1400C

Box furnace upto 1500C

Oven upto 300C

Ceramic tungsten carbide cutter

Glass melting facility

DTA (Differential Thermal Analyzer)

TGA(Thermo-gravimetric analysis)

Tube Furnace and Box Furnace
