

FOUNDRY LABORATORY

The foundry is one of those laboratories where students are given a feel of what it is like to work with metals & how raw metal can be designed into a final shape. Hence this laboratory is valuable in giving students a good practical experience of the industry. Some of the equipment available in the foundry include:

- Injetcion Molding Machine (Automatic)
- Induction Melting Unit
- Pit Furnace
- Bench-top Furnaces
- Sand- Mixer
- Molds for Casting

Injection Molding Machine (Automatic)

GW-15 Coreless Induction Melting Unit
