

INSPECTION & TESTING LABORATORY

No course outline on Materials Science & Metallurgy is complete without the presence of a well-equipped, state-of-the-art Inspection & Testing Laboratory. It is in this laboratory that students learn how to study different important mechanical properties of materials. Currently Inspection & Testing Laboratory is equipped with:

- 1000KN Universal Tensile Testing Machine
- Fatigue Testing Machine
- Creep Testing Machine
- Vicker's Hardness Tester
- Spark emission Spectrometer

1000KN Universal Tensile Testing Machine

RDL-3 Electronic Hi-Temp Creep Testing Machine

Spark Emission Spectrometer
